Cooperation in getting goals done

Continual improvement for methods & processes

Accelerated progress

Team Building Topics

Stages of team development

Common myths of teamwork

Work group or team?

Creating a **team environment**

Setting team goals

Inter-departmental teamwork

Why Team Building?

Teamwork is an **imperative in the workplace** as we cannot make things happen individually. High-performance teams ensure that the **goals of the organization become a reality** rather than just a vision.

Knowing how to facilitate the development of a team through its various stages - **forming, storming, norming, and performing** - ensures that teams don't get stuck in the process and underperform. There are many key strategies along the way and this workshop enables leaders to facilitate and develop **high performance** in their teams.

This **highly interactive session**, supported by written materials, real life case studies and DVDs, enhances the learning experience.
